Education

Institute of Engineering & Technology, DAVV, Indore

2024–2028

Bachelor of Technology in Computer Science & Engineering

CGPA: 8.14

Technical Skills

Languages: TypeScript, JavaScript, C++, Java, SQL

Frontend: React.js, Next.js 16, Tailwind CSS, Shadcn UI, TanStack Query

Backend: NestJS, Node.js, Express.js, REST APIs, Socket.IO

Databases: PostgreSQL (pgvector), Prisma ORM, Redis, MongoDB

AI & DevOps: RAG, Ollama, BullMQ, Docker, GitHub Actions, Turborepo

Core CS: DSA, OOP, DBMS, Operating Systems, Computer Networks

Projects

CodePilot — AI-Powered GitHub Code Review Platform

Next.js 16, NestJS, PostgreSQL (pgvector), Prisma, Redis, BullMQ, Ollama, Docker

- Built an open-source AI-powered GitHub code review platform that automates pull request reviews and enables repository-aware conversations using Retrieval-Augmented Generation (RAG).
- Designed a Turborepo-based monorepo with independent Web, API and Worker services, using BullMQ background workers and Redis for asynchronous repository ingestion.
- Integrated GitHub OAuth, GitHub App Installations and GitHub Webhooks to automatically synchronize repositories and trigger AI-powered reviews for new pull requests.
- Developed an end-to-end RAG pipeline using PostgreSQL (pgvector) and Ollama embeddings, enabling developers to chat with repositories, explain system architecture and answer implementation-specific questions.
- Built a dashboard using Next.js 16, Server Components and TanStack Query for repository management, pull request tracking, AI review visualization and repository chat.
- Containerized the complete platform using Docker, Docker Compose and automated CI/CD pipelines with GitHub Actions.

GitHub

Realtime Chat Application

Next.js, TypeScript, Socket.IO, PostgreSQL, Prisma, Tailwind CSS, Shadcn UI

- Developed a scalable real-time messaging platform using Socket.IO with secure authentication and event-driven communication.
- Implemented real-time messaging, typing indicators and online presence using Socket.IO and WebSockets.
- Integrated Google and GitHub OAuth authentication with secure session management.
- Designed normalized PostgreSQL schemas using Prisma for users, chats and messages.
- Built a responsive interface using Next.js, Tailwind CSS and Shadcn UI.

Achievements

- **TechIndore 2025 Finalist** – Selected as a finalist in TechIndore 2025, a national-level hackathon featuring teams from engineering colleges and startups across India.
- **Smart India Hackathon (SIH) 2025** – Selected among the **Top 50 teams** out of **180+ teams** from the institute for the internal Smart India Hackathon (SIH) 2025 selection.
- Solved **150+ Data Structures & Algorithms** problems on LeetCode using C++.
